

Company: Sodius Corp

Title: Linked Data Senior Software Engineer

Address: 418 N. Main St., Royal Oak MI 48067

Job Description: Full-stack developer building integrations for Engineering Tools and our OSLC Connect platform of tooling. Develop applications using advanced Java concepts, including memory management, multi- threading, and new language features up to Java 11. Develop Web and Micro Services with Java services libraries and frameworks, such as REST based services, JAX-RS, JMS, Bootstrap, Hibernate, etc. Leverage technologies to develop OSLC interfaces for 3rd party applications to support integration and reporting. Develop web user experience in Angular. Design, implement, and maintain applications that are high-volume and low-latency, required for mission-critical systems. Contribute to all phases of the development lifecycle. Write well-designed, efficient, and testable code. Respond to customers for mission critical issues and resolutions. Telecommuting permitted within the U.S.

Minimum Requirements: Bachelor's Degree in Computer Science, Computer Engineering or related. 5 years of experience as a Software Developer, or a related occupation. 5) years of experience in all of the following: 1) Working with Databases such as MySql or Oracle; 2) Developing with database queries in SQL or SPARQL; 3) Development in JavaScript; 4) Working with Java and Java libraries and frameworks, such as REST based services, JAX-RS, JMS, Bootstrap, or Hibernate; 5) Working with REST APIs for development; and 6) Working with the full development lifecycle tools, including Git, Jira, Jenkins, Ant, Maven, or TeamCity.
